OBJECTIVE

I am a self-taught full-stack web developer with a strong foundation in web development.My objectives as a MERN stack developer are to advance professionally and make excellent web applications. I would like to work in a team with dedication. I will acquire knowledge day by day to improve my skills.

SKILLS

Frontend	HTML,CSS,Bootstrap,Javascript,React JS,Next Js
Backend	Node JS,Express JS
Database	Mongo DB,SQL
Soft Skills	Adaptability, Team work and Time management

PROJECTS

1.Dots to Volume Built D2V, an architecture-focused web platform with a Master Control Panel to assign architects and manage project approvals, a Client Dashboard to track project phases and approve via OTP, an Architect Dashboard for efficient project management, a User Portal with phone OTP login, and an Estimation Tool for instant interior cost calculations. d2vinteriors.com

2.Portfolio(Abijithea) Designed and developed a live art portfolio website to showcase artworks with detailed descriptions and video presentations. Focused on delivering a visually engaging, responsive platform to help artists professionally display their work and build a strong online presence. abijithea.com

3.VKV Dental clinic Created VKV Dental Clinic's website, allowing patients to easily schedule appointments online, submit reviews to build social proof, and access service details. Focused on a mobile-friendly, SEO-optimized design to enhance user experience and clinic reach. Github

4.ALLORA Developed Allora, an E-commerce website for selling jewellery. The site offers an seamless interface for browsing and purchasing rings, bracelets, and earrings. Features include product listings, wishlists, and a secure checkout process. The project demonstrates my skills in developing user-friendly and effective online shopping experiences.. Figma

5.STAFFSTREAM A web application that creates, reads, updates, and deletes employee data, incorporating features such as search functionality and pagination for efficient data management using HTML, CSS, Javascript, Bootstrap, and a Node JS API. Github

6.LINKLIST I developed a Contact List Application to manage contacts effectively. Using ReactJS and Redux for the frontend, and Node.js, Express.js, and MongoDB for the backend, this app lets users add, edit, and delete contact information. It provides a user-friendly interface to display all contacts in a list, with options to update or remove entries Github

EXPERIENCE

Front-End Developer Intern (10 month of experience)

Stackup Learning Hub *Onsite – Technopark , Trivandrum, Kerala*

- Experience in developing and maintaining webapplications using MERNStack(MongoDB,Express.js,React.js,Node.js).

- Designed and developed dynamic and responsive websites using HTML, CSS, JavaScript, Node, React ,Next Js

- Worked with **REST APIs** to retrieve and display data from databases

- Implemented coding standards and version control for high-quality code.

- Worked with MVC frameworks to develop robust and scalable backends .

EDUCATION

Bachelor of Science in Physics, University of calicut

XII , Govt Model Boys HSS Kunnamkulam
